PORK PICKIN'S

by Earl Pickett

Appomattox Pork Producers

In a very erratic and uncertain market, prices for barrows and gilts at major terminals during the fore part of this week closed sharply lower. The range reached a high Monday of last week at $62 as compared with a drop Monday of this week at $55, while at the same time feed-grain prices climbed steadily higher.

The decrease in hog prices can be better illustrated by the change in hog-corn ratio for the week ending August 11 was $20.1 compared with $22.4 the previous week and $23.0 a year ago. This week's hog-corn ratio has dropped to $17.7. Thus last year with hogs selling for $30 per 100 weight, the profit margin was several times greater than it is with the so-called high prices of hogs of today.

STIR-FRIED PORK AND VEGETABLES

1 lb. lean boneless pork (tenderloin, chops or loin roast)
2 tbls. cornstarch
3 tbls. Kikkoman Soy Sauce
1 teas. sugar
1 clove garlic, crushed
¼ teas. ground ginger
1 cup water
2 tbls. shortening
1 pkg. (6 Oz.) frozen pea pods, thawed and drained
3 medium tomatoes, cut in eighths

Slice pork into thin strips. Blend 1 tbls. each of the cornstarch and soy sauce, sugar, garlic and ginger; stir in pork and let stand 15 minutes. Meanwhile, combine water with remaining soy sauce and cornstarch. Heat shortening in large frying pan or wok over high heat about ½ minute. Add pork and stir-fry about 3 minutes, or until pork is tender. Stir in pea pods, tomatoes and soy sauce mixture. Cook, stirring gently, only until sauce thickens and vegetables are heated. Serve immediately. Makes 4 servings.

VEPCO WILL INCREASE POWER OUTPUT

Cont'd from Page 1

Moore Jr. said that the units will be escalated gradually from the previously authorized 92 per cent of power on or about Dec. 1, followed by Unit 2 on or about Feb. 1, 1974.

Earlier limits of power output were imposed pending completion by the AEC of review of the fuel densification phenomenon in all pressurized water reactor designs.

"We are pleased that the AEC has concluded that both Surry units can be operated at full power without endangering the health and safety of the public," Mr. Moore said.

...with several fertilizer dealers and manufacturers. Most will agree that the availability of fertilizer will be more critical in '74 than it was this year. Phosphate priceed are likely to be up substantilly and nitrogen will probably see a price rise.

This suggests the need for fall fertilization where practical. What are some of these areas? Alfalfa, pastures, apply all phosphate and potash and plow down for corn. Some corn producers tell me that are experiencing increased yields with this practice. If you plan to stubble plant soybeans behind small grain, add an extra 60 to 70 pounds of P and K to the small grain and none under the beans at planting time.

Lime availability is a concern of many farmers that have contacted me in recent days. Two cards of Austinville lime were used on two farms last week. The price of this product spread will probably run $7.25 to $7.50 a ton.

Last Thursday I learned that the Appomattox Lime Company had resumed making lime. This will be good news to area farmers. Hopefully they will see fit to make a large supply of finely ground limestone rather than course ground limestone. Growers may want to request the higher quality product. Lime prices will be up from this source. I under the cost is $3.00 per ton.
